DRAINAGE AND FOOTPATH ISSUES – CARPENTERSTOWN ROAD - AI106738

Question: Councillor E. Carbone-Mangan

"To ask the Chief Executive if consideration can be given to investigate and rectify the drainage and footpath on the Carpenterstown Road, from the junction with College Road and the entrance to St. Vincent's Castleknock College, as the surface drainage system is not receptive and constitutes a safety hazard for motorists, additionally, the surface of the footpath in proximity to one of the two locations, is prematurely collapsing which suggests that the subbase is not sufficiently competent?"

Reply:

An inspection at this location was undertaken on 13th of February during which it came to our attention that the outlet for the surface water line was blocked and a section of damaged pipework needed replacing.

The line was cleaned which will alleviate the problem for the time being. Planned works to replace the damaged section of pipe is scheduled for the end of Q1 2026, which should resolve the problem.

EXPANSION OF YELLOW BOX AT COLLEGE GROVE - AI106749

Question: Councillor E. Carbone-Mangan

"To ask the Chief Executive if consideration can be given to expand the yellow box at the entrance to College Grove, to facilitate a safe right turn onto College Road at peak times due to restricted visibility from stationary traffic?"

Reply:

The current yellow box on College Road is approximately 15 metres long and spans the full width of the entry/exit point of College Grove.
The Traffic Section would not extend the yellow box at it spans the full width of the College Grove entrance. The Traffic Section deem that the current yellow box is appropriate for this location.

SPEED SURVEY ON PORTERSTOWN ROAD - AI106777

Question: Councillor S. Shovlin

"To ask the Chief Executive to provide an outline of when the Council plan to carry out the next speed survey on Porterstown Road to determine if new measures have addressed issues or if additional work/measures may be needed?"

Reply:

There have been a number of site visits to Porterstown Road to monitor the new ramps since their installation. It is clear from the inspections and observations that the ramps are acting positively in slowing motorists speed on this road.
The Traffic Section do not intend to carry out any further speed surveys where ramps have been placed.

The Traffic Section has confirmed that it will carry out speed surveys in Q4 of 2026 on the section of road from the M50 bridge to the series of bends before the Sandpits.

DAMASTOWN PARK DOG RUN - AI106846

Question: Councillor B. Hanaphy

"To ask the Chief Executive if consideration can be given to install a dog run in Damastown Park?"

Reply:

Currently, the installation of a dog run at Damastown Park is not being considered. There are 8 Pitches in Damastown Park. There is one area of open space left measuring 2,500m2 approximately which can be used for passive recreation. To utilise this for a dog run would not be in the best interests of all park users.

Currently dogs can be walked off leash before 11am and 1 hour before park closing/dusk.

INSTALLATION OF TEMPORARY FENCING – MICK WALSH PARK – AI106951

Question: Councillor B. Hanaphy

"To ask the Chief Executive to provide a report on plans to put temporary fencing and planting in place at Mick Walsh Park, to deter scrambler users from jumping onto the top pitch, which results in them cutting up the pitches?"

Reply:

In the past twelve months, from February 2025 to February 2026 the pitches at Mick Walsh Park have not been called off due to damage from scrambler use.

The pitches have been called off recently due to poor weather conditions.

The Operations Department is not considering installing a fence around any of the pitches here. It is planned to carry out tree planting here in the 2026/2027 season within the park.

ITEM NO. 19

UPDATE ON IMPLEMENTATION OF NATIONAL SPEED LIMIT REVIEW IN DUBLIN 15 - AI106228

Motion: Councillor J. Walsh

"That the Chief Executive provides an update on the plan and timeline for the implementation of special speed limit bye-laws for urban and built-up areas in Dublin 15 in line with Circular RW21 of 2025 and indicates when this process is likely to commence."

Report:

The National Speed Limit Implementation is being rolled out on a country-wide basis led by the Department of Transport (DoT). Initially, there were three phases but since the circular RW 21 2025 and subsequent workshop with the Department of Transport, there are now four phases. These phases are outlined below.

- Phase 1 Local Rural Roads
- Phase 2 Urban Core Areas
- Phase 3 National Secondary Roads
- Phase 4 Rural Schools

To commence the work on the Phase 2 Urban Core Areas, all local authorities were awaiting a Circular and technical guidance to issue from the DoT. These were issued on the 16th October 2025 in conjunction with the Minister directing all local

authorities to start the Phase 2 process. The objective is to have the 30km/h speed limits in built-up and urban areas operational by 31st March 2027.

As previously advised, the introduction of these 30 km/h speed limit changes will be implemented by local authorities, through the adoption of special speed limit bye-laws, rather than by changing default limits. A special speed limit is a speed limit set locally by each local authority and must be in accordance with Setting and Managing Speed Limits in Ireland Guidelines (now updated). As outlined in section 9 of the Roads Traffic Act 2004 the making and adoption of special speed limit requires statutory public consultation and is a reserved function of the council.

Traffic Operations have examined the technical guidance from the DoT and have progressed with work on creating draft bye-law maps for all urban/built up areas in Fingal's County Council administrative area. Currently, speed surveys are being progressed to gather data on speed and vehicular movements.

It is intended to conduct informal workshops with each area committee prior to commencing the statutory consultation phase. These workshops are intended to be held during the latter stages of Q2/2026.

ITEM NO. 21

TYRRELSTOWN FC ACCESS TO TYRRELSTOWN ASTRO PITCHES - AI106744

Motion: Councillor J. Burtchaell

"That the Chief Executive review the allocation of slots for the Tyrrelstown all-weather pitches with a view to providing a greater level of access to the local club, Tyrrelstown United Football Club, which caters for over 300 children in the area and to apply the Council community rate for the club's hours on the pitches."

Report:

The all-weather pitch at Tyrrelstown is managed and maintained by Tyrrelstown GAA and Clonee United by way of a management licence agreement with the Council.

Under the terms of the agreement, the pitch is a community facility and available to all local clubs for access. The anchor tenants are using Sportskey, i.e. sports facility management software in the allocation of slots for the all-weather pitch, ensuring openness and transparency in this process.

Officials from the Operations Department met with both anchor tenants and Tyrrelstown United Football Club over the past two weeks to discuss concerns raised by Tyrrelstown United Football Club regarding their inability to secure adequate access to the pitch in question. As a result of our meetings with the clubs, the allocation of slots are currently being assessed, with a view to providing additional slots for Tyrrelstown United Football Club.

Unfortunately, this situation has arisen due to the weather conditions and the grass pitches being out of action for the near future, which has created a demand for the use of all weather pitches by clubs, not just in Tyrrelstown but across the Fingal area.

Tyrellstown GAA and Clonee United, as licensees to this agreement, is responsible for the management and the operation of this facility on behalf of the Council, which includes daily/weekly maintenance of the facility, opening/closing of the facility, payment of all outgoing utility bills including maintaining adequate employers and public liability insurance.

Regarding the cost of allocation slots, as per the management license agreement, the two licensees' i.e., Tyrellstown GAA and Clonee United are charged at €60 per hour. There is no community rate in the agreement. All other clubs are charged at €120 per hour.

ITEM NO. 22

TRAFFIC MEASURES AT POWERSTOWN ROAD, MULHUDDART - AI106848

Motion: Councillor M. McCamley

"That the Chief Executive provide a report on any traffic measures which might be in place to alleviate the traffic chaos on Powerstown Road, Mulhuddart, especially at school times?"

Report:

A site inspection was carried out on the Powerstown Road on the 19th February. The findings in the location around the school are as follows:

- The speed limit on this section of road is set from 30kph to 50kph and is a periodic speed limit, depending on school traffic both during AM/PM peak times. The periodic sign is a flashing solar powered sign
- The speed limit is clear and visible
- There is adequate signage indicting school ahead and advising SLOW.
- There is warning sign in advance of the school showing 'Traffic Calming'.
- There are traffic calming measures in the form of ramps outside the school. Ramps are the highest form of traffic calming measures.
- Although there is no kerb, the verge has been left with a 250mm vertical edge, which acts as a kerb along the location of where the seated area is.
- There are zig-zag markings at the school, which are illegal to park on
- There is a safe route to schools in place, including pencil bollards along the verge edge which prevents parking.

- The school has a designated internal set down area

The findings in the location of the garden allotments are as follows:

- There is speed limit repeater sign
- The road has ‘SLOW’ road markings
- There are warning signs before the bend showing sharp bend and ‘SLOW’.

The traffic section has implemented all the traffic matters possible to improve road safety and assist in managing traffic flows at this location.

ITEM NO. 23

TRAFFIC LIGHTS AT LITTLEPACE BRIDGE - AI106728

Motion: Councillor A. Donnelly

"That the Chief Executive explores measures to address the power supply issues with the traffic lights at Littlepace Bridge that resulted in two outages and caused at least one serious accident in January."

Report:

Historically, traffic lights are fed from the power of the Public Lighting. This is the case with the traffic lights at junction 4 on the M3.

The Traffic Section has applied to the ESB to get the traffic lights onto their own power supply. The application was submitted to the ESB on the 13th of February.

The ESB will review the application and determine where the power can be taken from. They will issue a service drawing and agreement to Fingal County Council. Please note that there is no set time frame for this process.

Once the Traffic Section receives the service drawing, they will endeavor to get the works carried out soon thereafter.
