ITEM NO.24

Engagement with the National Transport Authority (NTA) and Irish Rail re Lusk/Rush Train Station - AI109443

Question: Councillor M. Boland

"To ask the Chief Executive for an update on any engagement with the NTA and Irish Rail regarding the proposed new entrance and improved access arrangements at Rush/Lusk Train Station, including any interim safety measures being considered for pedestrians and cyclists accessing the station from both the Rush and Lusk sides?"

Reply:

FCC met with Irish Rail and Dublin Bus in late August to discuss the proposed improved access which is part of the Dart+ Coastal North project. Irish Rail are preparing a detail design for the junction which will be developed further to improve safety of users. Aside from the Irish Rail project FCC have engaged a consultant to prepare a design for an Active travel scheme between Rush and Lusk. This design is at Project Lifecycle Phase 2 (Options Assessment), with the Options Assessment Report to be delivered in Q1 2027.
